Projects

Software Development
Github: https://github.com/evanjo03 | Website: https://evanjo03.github.io

Text-Based Adventure Game| Express.js, mySQL, bcryptjs, Sequelize, express-validator, Heroku |
Fully-fledged full-stack application with a web bootcamp-themed storyline
- Complete story-based game with user storage in a SQL DB and custom authentication

NPR News Scraper| Node.js, Express.js, MongoDB|
Web application used to store and favorite news articles
- Full-stack application using Express.js routing, MongoDB for database/user storage, and Node.js web server
- Uses cheerio to scrape NPR articles which can then be favorited and stored

Train Scheduler | Firebase, Moment.js |
Single-page application to track and modify train line data in real-time
- Data storage for each train is housed in Firebase Realtime DB
- Dynamically displays trains housed in Firebase with jQuery

Relevant Experience
